Right now we are working with CalRecycle for assistance with solid wastes at the site. Superfund can only address hazardous wastes. We were working with DTSC ER during the emergency phase, but no specific involvement during the removal action has been identified at this time. If there are any longer term remedial issues at the site, then there may be a DTSC role for oversight.

Jason –

Adam also included the following in his message:

“Also, you mentioned during the conference call that the state will likely be involved in the cleanup. Is CalRecycle or CalEPA involved with the cleanup at this point?”

Is EPA working with both CalRecycle and CalEPA on this cleanup? Please share any thoughts on how you respond to this cleanup and if each has distinct roles in their involvement, please pass along how you would like their involvement characterized. Thanks.

This week we are conducting community outreach and receiving equipment/materials at the site. Work activities are scheduled to begin next week, 11/17/16, and will start with installation of a debris barrier along the property border with the residential neighborhood.

**Subject:** Checking in Re: Fruitland Magnesium Fire Site

Hi Brent,

I hope you are doing well. I wanted to check in with you to see if the EPA has begun the cleanup of the Fruitland Magnesium Fire Site. I remember the target date is today, October 11<sup>th</sup>, so I just wanted to check in. Also, you mentioned during the conference call that the state will likely be involved in the cleanup. Is CalRecycle or CalEPA involved with the cleanup at this point?

Any updates would be greatly appreciated.

All the best,

**Adam Sachs | Legislative Assistant**
